GEORGII ELISEEV

Deflections

Works 01 - 05

Deflections is a series of ink works developed through a limited set of relational and directional conditions. Devoid of a predetermined image, the lines are repeated, connected, and subsequently deflected from the initial structure. The repeated movements allow the lines to accumulate as deposits, leaving incomplete forms that were not anticipated at the outset. The series investigates how organization provides the conditions necessary for form while never controlling what emerges within it.
